

About the Company

- Founded in Finland in 1985; originally designed to enclose balconies during winter
- Currently used in over 25 countries around the world
- Approved for use in the United States since early 2007

About the System

- We only use 3/8" double thick, Low-E, Tempered & Laminated Glass
- Performance tested for water penetration and wind infiltration; can withstand winds of 222 MPH
- FIVE times stronger than standard glass - virtually unbreakable
- No bulky frames — Cover Glass USA systems are FRAME-LESS
- Opens fully or partially
- System can be made to open to the inside or the outside
- Panels can be designed to stack on either the Right side, Left side, or both — you decide
- Only takes up 1" per panel when stacked
- Glass panels automatically magnetize and lock into position when stacked
- Glass is available in a variety of colors: choose from *Clear, Light Bronze, Light Gray, Green, Blue, as well as special reflective coats*
- Fully secure system with different locking options; can even be alarmed
- Lower track can be completely recessed to sit flush with your finished flooring — no uneven surfaces or anything to step over
- Each glass panel can be up to a maximum of 9' 2" in height and 33" wide (length of system is unlimited)
- Cover Glass USA does all its own installations; no subcontractors or third parties

*Installing a Cover Glass system
to your property adds considerable value
and provides gorgeous, clear, unobstructed views.*
