KITCHEN LIGHTING needs to be multipurpose, offering adequate light while adding that last decorative touch to your kitchen. Consider chandeliers with washable glassware that will not be affected by kitchen grime. Accent lighting is a bonus in kitchens, be it matching island lights or single pendants over islands, or matching pendants and semi-flush styles over work areas. With more sources of lighting in your kitchen, you will eliminate annoying shadows and dark spots.

stylish vanity

your oasis awaits you

BATHROOM LIGHTING achieves a dual effect. Bright light should enable you to perform tasks more effectively, such as applying makeup or shaving while the style should also bring the look of your bathroom to life. Single sconces on both sides of a mirror can provide a very elegant effect. However, to achieve a higher light level, a 3 or 4 light sconce, either inset or mounted on top of the mirror itself may be needed.

OUTDOOR Lighting beautifies the outside of your home while achieving security and safety. Always use a lantern style, which offers enough light and visibility to see your house number. Consider energy saving lamping such as the LED lanterns shown above. Your outdoor lighting can be left on all evening, providing beauty and security while using minimal energy. Outdoor products should be easy to re-lamp and maintenance free.
