Breaking News... SRC to be First in Minnesota to Offer Revolutionary New Laser this September

By Dr. Beth Hagberg

Halo - the world's first and only Hybrid Fractional Laser is Coming Soon

At Skin Rejuvenation Clinic we are committed to always offering cutting edge technology and we are proud to say we have done it again. This September, our clinic will be the first in Minnesota to offer **Sciton's Halo Laser**, the world's first hybrid laser to combine non-ablative and ablative resurfacing, producing dramatic results. What this means is that Halo can provide you with the impactful

My Name: Ann Marshall

My Role: Cosmetic Physician

My Must-Have Product:
SkinMedica Vitamin C & E Complex

Why This Product is a Must-Have for Me:

This Vitamin C is a must have during the summer months. Not only does it fade dark spots and restore a glow to the skin, but is also packed with antioxidants to protect from more skin damage.

More on this Product:

results similar to that of our more aggressive (ablative) treatments, but with totally controllable downtime.

Why is this so exciting? The "million dollar challenge" we have faced over the years as cosmetic providers is, "how can we give our patients the most bang for their buck while providing them with the least amount of downtime or personal inconvenience?" The "Results vs. Downtime" debate will dramatically change with the arrival of Halo, as soon you will not be required to spend a long weekend with a red, peeling, face if you want results formerly offered solely by fractional surfacing. In fact, after receiving a Halo laser, patients will have a glow which is how Halo acquired it's name! With this treatment you can leave our office wearing a light tinted sunscreen. Through our comprehensive study, we have seen Halo provide the most amazing results.

What does this amazing laser treat? The Halo treatment will be exceptional at diminishing the signs of aging and photo damage. This includes fine lines, deeper wrinkles, and hyperpigmentation. It will also be a standout treatment for those dealing with acne scarring or large pore size.

Call now to book your Halo consult in August and then you will be ready to be one of the first in the state to reap the rewards of this GAME CHANGING laser when it arrives mid September. Call today (952) 920-6545.

G.R.A.S.P. Focus: Specialty Products

As we proceed through our G.R.A.S.P. formula for perfectly healthy skin, specialty products is really where your routine becomes fully customized to your needs. Like adding an extra shot of espresso to your morning coffee, the purpose of a specialty product is to serve as an individual and impactful twist on the staple pieces that are already working to correct and rejuvenate your skin. When combining specialty products with the rest of our grasp regimen treatments, you will see both results in the overall

process is gentle enough for all skin types and is perfect for summer!

Consider One of These Other Eye Rejuvenation Treatment Options:

Botox or Dysport for Crows Feet -

Crows feet are a pesky result of genetics, aging, and (bittersweetly) a lot of smiling. Smoothing out the outer edges of your eyes is a great way to create a more youthful appearance which can be accomplished in only 15 minutes with the help of our skilled providers and Botox or Dysport. **Dysport Rebate:** Receive a \$25 mail-in rebate on your Dysport service while supplies last.

Upper Eye Lift with Injectables -

Heavy looking upper lids can drag down your appearance and close off your eyes. Our physicians can use a customized blend of Botox and dermal fillers to lift the upper eye and temple, resulting in a defined and well framed eye.

Eye Ultherapy -

If you're dealing with mixed bag of problems in the eye area our Ultherapy for eyes is your golden ticket. This non-invasive treatment uses ultrasound in the deeper layers of tissue to stimulate collagen in all areas treated, smoothing lines as well as lifting and firming the skin. The best part: results are long lasting.

Fix Tired Undereyes with Dermal Filler -

Dark and sunken under eyes plague us all and are the trickiest to fix with even the best coffee and concealer. An undereye filler will immediately smooth out bags and create an awake, open and more rested appearance.

Balancing Brows with Botox or Dysport -

If you feel like your brows are permanently headed different directions, Botox or Dysport are easy ways to get them back on track. With minimal injections and no downtime our physicians can subtly lift and sculpt brows to make them more symmetrical.

Dysport Rebate: Receive a \$25 mail-in rebate on your Dysport service while supplies last.

Sculptra Rebate: Receive a \$50 mail-in rebate on your Sculptra service while supplies last. Maximum of 2 vials per form, for a maximum rebate of \$100.

President of Allergan Visits Skin Rejuvenation Clinic

This month Skin Rejuvenation Clinic welcomed to our practice Philippe Schaison, President of Allergan, U.S. Medical. Mr. Schaison toured our clinic and met with practice leaders to discuss

look and feel of your skin but also in the areas of concern specific to you.

For example, adding a lightening product like SkinMedica's Lytera to a routine that includes a growth factor, retinol, and antioxidant will give your skin even greater luminosity and erase dark marks, sun damage, and melasma. Another area of concern where specialty products are needed is the eye area. Take a peek at our featured eye products to figure out which one will work best for your dark circles, lines, or tired appearance.
